Agile Delivery Manager

Description

Responsibilities
Delivery managers:

– lead on agile and lean practices

– Use a variety of agile and lean tools and techniques in order to help the team keep a delivery and learning cadence that helps to remain focused on delivering value against the product vision

– build and maintain motivated teams, making sure there is an iterative plan to work towards

– protect the team and make sure the team collaborates, communicates and focuses on what is most important

– coach team members and others, facilitate continuous improvement and apply the most appropriate agile and lean tools and techniques for their environment

– proactively manage dependencies, overcome obstacles and get the best value against constraints

– manage risks, budgets and people

– Challenge and improve organisational processes

Qualifications
Candidates will be considered against the DDaT framework for Delivery Manager and candidates should ensure that they align their applications to show how each area is covered –
